

HUGO MARTÍN BADEL

Creative Technologist & Creative Operations Lead

Bogotá, Colombia · Remote-first · Bilingual EN/ES (fluent) | cbadelhugo@gmail.com · +57 312 387 1795 | cbadelhugo.github.io/portfolio · github.com/cbadelhugo · linkedin.com/in/hugo-martín-badel-castro

Creative Technologist & Creative Operations Lead. I identify the bottleneck, design the solution, and direct its build — **diagnosis and design are the work; the code is execution**. Promoted from video editor to Creative Manager at Ten2Media in ~5 months to found its **first Creative Department**, I run content across **~50 channels (90M+ views)** on an operating system I designed: SOPs, review cadences, and the automation that lets a small team ship **40+ videos a week**. The software I've shipped — a mobile app live on the App Store, desktop production tools in daily use — is evidence of that judgment: each began as a problem I framed, not a spec handed to me.

EXPERIENCE

Ten2Media — Creative Manager

Nov 2024 – Present · Remote

Promoted from Video Editor to Creative Manager within ~5 months to build the company's first dedicated Creative Department.

- **Lead creative production across ~50 YouTube channels** — including official channels for Frank Sinatra, BigXthaPlug, and Brent Faiyaz — driving **90M+ combined views**; launched a catalog channel that reached YouTube monetization in **8 days**.
- **Built the department's operating system** (standardized briefs, moodboard alignment, consolidated review), cutting the brief-to-approval cycle to **~16 days** and eliminating post-launch redesign churn.
- **Authored the creative SOP library** (thumbnails, loop systems, selection criteria, content matrices) so the team runs channels consistently without per-task oversight.
- **Engineered internal automation and AI tooling** that replaced manual work at scale — including a browser-automation pipeline that produced **21 multi-track compilations (240+ tracks) in one unattended 59-minute run**, and a computer-vision pipeline auto-moderating 10–15-hour recordings.
- **Raised output from ~10 to 40+ videos/week** — cutting batch production time from ~8 to ~3 hours — through batch workflows (7–10 compilations/day) with no proportional increase in headcount.

Freelance — Creative Technologist / Producer

Jan 2024 – Present · Remote

- **ONErpm (ongoing)**: produce lyric-video channels using **Liner**, a macOS production app I built, to deliver **10+ videos/week** — a volume not achievable by hand.
- **Empieza por Mí** (coaching brand): direct content end-to-end; built an Adobe Premiere automation panel (ExtendScript) and **Weave**, a local AI-agent editor that turns 2-hour recordings into finished cuts (~6 hours of manual editing saved per video).

ONErpm — Lead Content + Studios Video Editor

May 2022 – Nov 2024 · Bogotá

Promoted from Studios Content Creative to Lead Content + Studios Video Editor within ~10 months.

- **Established the Studios content-production function** — defining the workflows and standards a 4-person team ran on.
- Directed content for **2 markets (Andean region / CAN and US Latin)** and 5 internal departments; lifted content-workflow efficiency ~20%.
- (2022–2023, Studios Content Creator): full pre- to post-production; contributed to ~30% growth in audience engagement.

SELECTED TOOLS & PRODUCTS BUILT — AI-assisted development, end-to-end ownership

Puzzlr — Mobile app (iOS + Android), **live on the App Store**. Puzzle-collection tracker with on-device OCR, in-app subscriptions, and cloud sync. Built and shipped solo. puzzlr.app

Liner — macOS app producing lyric videos at scale: automated transcription + lyric alignment and 4K rendering. Powers 10+ videos/week. github.com/cbadelhugo/liner

Weave — Local AI-agent video editor: auto-transcribes, cuts, and finds the narrative hook in long recordings. In production. github.com/cbadelhugo/weave

Content Automation Toolkit — ~15 tools I've built and reuse across projects: multi-source photo sourcing, computer-vision moderation, AI image generation/upscaling, and multi-API orchestration (Notion, Canva, Google Drive).

SKILLS

Creative Operations & Leadership — SOP & systems design · team leadership · creative direction · multi-channel content strategy · YouTube growth & optimization · performance reporting & KPIs

Technical & Tooling — workflow automation · AI-assisted development · browser automation · FFmpeg / video pipelines · computer vision & AI image tooling · API orchestration · Python, JavaScript/React, Node

Production & Design — Adobe Premiere Pro, After Effects, Photoshop, Illustrator · generative AI (Midjourney, Veo, Runway, Gemini) · motion graphics · thumbnail & brand design

EDUCATION

Politécnico Grancolombiano — Bachelor in Audiovisual Media; Diploma in Digital Communication · **Domestika** — 15+ courses (motion graphics, storytelling, post-production)

Languages: Spanish (native) · English (full professional proficiency — daily working language)
